

KEM-714 Recording Contact Counter (Long-term Monitoring)

The KEM-714 provides reliable counting and recording of pulses output by a pulse output-type sensor to which it is connected, such as a tipping bucket rain gauge or wind run speed sensor. Each pulse the KEM-714 receives drives an internal pulse motor. Either a 1-month or a 3-month chart can be used with the KEM-714.

**APPLICATIONS**

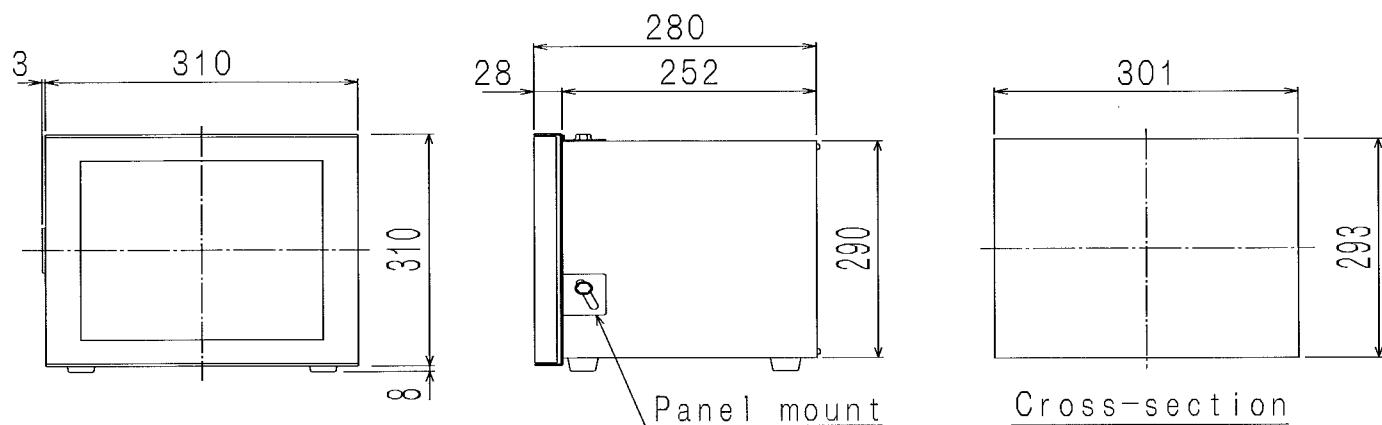

Connection to sensors that output an electrical contact pulse signal of ≤ 2 pulses/s

FEATURES

1. Accurate operation provided by pulse motor
2. Easy to use and maintain

SPECIFICATIONS

Components	Spiral cam to drive an automatically repeating 0-100 pulse count, scroll or folding chart paper
Measurement range	0 to 100 pulse count
Power source	100 V AC or 12 V DC
Standard components	Recorder only
Size/weight	Approx. 310 × 280 × 310 mm, 16 kg

Recording Contact Counter (Long-term Monitoring) Dimensions
